

Revolution!

A New Plan for Selecting Representatives

GET OUT OF OUR HOUSE: Revolution! Tim Cox

GET OUT OF OUR HOUSE

Tim Cox

Politicians have taken control of our government, and the long-term viability of our nation is at risk. The time has come to take a stand—we cannot afford to wait any longer.

Get Out of Our House (GOOOH) details the plan America will use to evict all 435 politicians from the United States House of Representatives—replacing them with patriots just like you. Author and patriot Tim Cox has created a system designed to bypass the two parties, sever all ties with special interest money, replace career politicians, and hold elected officials accountable. **GOOOH** was designed not to favor any person or viewpoint. The system allows the people who participate in the process to select the candidate who can best represent their district.

This is your call to action. Will you join the revolution, or leave the problem for our children and grandchildren? Every American patriot is encouraged to step forward. The fate of our nation depends on you. It is time to engage!

Armed with a computer science degree from The University of Texas and an M.B.A. from St. Edward's University, **Tim Cox** has developed complex computer systems for the last twenty-four years. He has created software for a spy satellite, put credit card readers in gas pumps, and created innovative systems for one of the world's largest computer companies. He now aims to revolutionize the way we select our representatives.
